# Workshop Presentation Setup

Important Information for Speaker

The following hardware is on stage and is used to control the presentation by the Speaker:

Presentation Screen
(signal identical to beamer)

Speaker Timer screen
(shows how many
minutes remaining)

Keyboard
(full control over your presentation)

Remote slide control
(slide backward / forward)

You can use the
keyboard buttons
for slide control too

Powerful green
laser pointer

Mouse
(full control over your presentation)

- There is no computer running the presentation on stage. The presentations run on the laptops on the Chairman's desk.
- Please **upload your presentation** to these laptops **before** you have your talk and test it on these laptops.
- During your presentation the Chairman can help you "online" if you have a problem with your presentation. He/She has <u>parallel access</u> to your presentation.
